SOME PLAIN TALK ABOUT THE MODEL 257 TUBE TESTING OUTFIT WITH A MINIMUM OF ADVERTISING WORDAGE.

Reading time . . . 25 seconds.

Incomparable because the Model 257, to the best of our knowledge, is the first Tube Tester ever made which includes as standard equipment, not optional, all accessories for testing black and white and color TV tubes as well as standard tubes. Furthermore, these accessories are *compatible* since they have been designed to function specifically with the improved circuit used in the Model 257.

We have been producing Radio, TV and Electronic Test Equipment since 1935, which means we were making Tube Testers at a time when there were relatively few tubes on the market, way before the advent of TV. The Model 257 employs every design improvement, every technique we have learned over a steady production period of 32 years.

Because we *want* you to be skeptical, we offer to ship the complete Model 257 Outfit to you *at our risk* on the basis spelled out in plain language on the enclosed circular and card.

ACCURATE INSTRUMENT CO., INC.

The New 1968 Improved Model 257 **A REVOLUTIONARY NEW TUBE TESTING OUTFIT**

- Tests all modern tubes including Novars, Nuvistors, Compactrons and Decals.
- All Picture Tubes, Black and White and Color

COMPLETE WITH ALL ADAPTERS AND ACCESSORIES, NO "EXTRAS"

STANDARD TUBES:

- ✓ Tests the new Novars, Nuvistors, 10 Pins, Magnovals, Compactrons and Decals.
- ✓ More than 2,500 tube listings.
- ✓ Tests each section of multi-section tubes individually for shorts, leakage and Cathode emission.
- ✓ Ultra sensitive circuit will indicate leakage up to 5 Megohms.
- ✓ Employs new improved 4½" dual scale meter with a unique sealed damping chamber to assure accurate, vibration-less readings.
- ✓ Complete set of tube straighteners mounted on front panel.

BLACK AND WHITE PICTURE TUBES:

- ✓ Single cable used for testing all Black and White Picture Tubes with deflection angles 50 to 114 degrees.
- ✓ The Model 257 tests all Black and White Picture Tubes for emission, inter-element shorts and leakage.

COLOR PICTURE TUBES:

- ✓ The Red, Green and Blue Color guns are tested individually for cathode emission quality, and each gun is tested separately for shorts or leakage between control grid, cathode and heater. Employment of a newly perfected dual socket cable enables accomplishments of all tests in the shortest possible time.

The Model 257 is housed in a handsome, sturdy, portable case. Comes complete with all adapters and accessories, ready to plug in and use. No "extras" to buy. Only **\$47⁵⁰**

EXAMINE BEFORE YOU BUY! (See other side)

Announcing- for the first time ever...

A complete TV Tube Testing Outfit designed specifically to test all TV tubes, color as well as standard.

Don't confuse the Model 257 picture tube accessory components with mass produced "picture tube adapters" designed to work in conjunction with all competitive tube testers. The basic Model 257 circuit was modified to work **compatibly** with our picture tube accessories and those components are not sold by us to be used with other competitive tube testers or even tube testers previously produced by us. They were custom designed and produced to work specifically in conjunction with the Model 257.

Examine before you buy. Use our postage-free card.

READ THIS IMPORTANT MESSAGE NOW!!

**You don't pay for the Model 257 until AFTER you
have examined it in the privacy of your home!**

**SEND NO MONEY WITH ORDER
PAY POSTMAN NOTHING ON DELIVERY**

Yes, when you send in the enclosed postage free card you are merely giving us permission to submit the Model 257 Tube Testing Outfit for your approval. If, after trying it you decide to keep it, **then and only** then do you send us \$10.00 and

pay the balance at the rate of \$10.00 per month until the total price of \$47.50 (plus p.p., handling and budget charge) is paid. If not completely satisfied, you simply return the unit to us, no explanation necessary.
